I further understand that if my treatment is associated with a personal injury or accident claim, all medical bills will be paid at 100% of the above fee schedule regardless of the outcome of the case. I understand that if a check or debit is returned for insufficient funds, I will be charged a \$25.00 service charge.

**I have read and fully understand the above financial terms and prices.**

## INFORMED CONSENT

It is our responsibility to fully inform you of your treatment. Part of this includes a discussion of any potential side effects or complications. All treatments potentially can cause these reactions, and chiropractic manipulation is no different. It, however, has one of the safest records of the wide range of treatments that can be used for spinal disorders. Please feel free to ask the Doctor if you need any clarification.

Possible adverse effects of spinal manipulation can include soreness in the area of treatment, reactive muscle spasm, injury to the disc causing pressure on nerve tissue, fractures in weakened bones such as ribs, and injury to arteries in the neck resulting in stroke. Soreness or reactive muscle spasm or tightening are common but usually brief reactions to treatment. The other potential complications are rare. It is best to examine the frequency of these potential complications versus the relative frequency of the complications of the other typical treatments which may be used for a spinal disorder.

**DISC INJURY from manipulation causing spinal cord pressure**

**1 per 100 million cases**

**1 per 400 million (cmt)**

**ARTERY INJURY from manipulation causing stroke**

**1 per 1 million**

**NEUROLOGICAL complication from**

**Neck Surgery            1 per 64 (cases)**

**Back Surgery            1 per 333 (cases)**

**DEATH RATE from neck surgery**

**1 per 145**

Perhaps the most common alternative to spinal manipulation is the use of anti-inflammatory drugs or NSAIDs. These drugs cause fairly common and can also potentially cause serious complications.

<b>COMPLICATIONS ASSOCIATED WITH ANTI-INFLAMMATORY DRUG USE</b>	
Serious stomach or intestinal bleeding	1-4 per 100 users
Hospitalizations from complications	20,000 per year
Deaths from complications	2,600 per year

I have read the above and understand the risk of complication that may occur from spinal manipulation. With this understanding, I consent to treatment with spinal manipulation by Eric Belusa, DC or any DC at Performance Chiropractic.
